

# Junior Software Engineer - C# Developer

(.NET , Xamarin , Web API , Azure )

## Job Description

We're PitPat and we're connecting dogs to the internet. Yes really, we're not barking mad. We're using the latest technology to help owners and pet care brands keep dogs happy and healthy. And they love it!

If you want to create high quality solutions and help grow a fantastic and collaborative team, with the satisfaction of knowing your code will be enjoyed by tens of thousands of users, we want to talk to you.

In our pawsome development team you will:

- Work as part of a cross-functional full-stack development team to develop and deliver new versions of the PitPat app and cloud platform to be released on a regular basis.
- Collaborate with project strategy stakeholders to refine and define the functionality, specifications and features of each new version of our app and cloud platform.
- Be involved in carrying out tasks across the entire software development lifecycle.
- Work with some of the latest versions of .NET Framework and .NET Core.

The successful candidate must have:

- Examples of projects. These can be personal, academic or workplace projects that can be demonstrated at interview.

The following experience is highly desirable:

- 0 - 2 years industry experience (this could be as part of an internship or placement year).
- Experience or knowledge of OO implementation and design.
- Experience or knowledge of unit testing.
- Experience developing mobile applications (preferably using Xamarin).
- Experience or knowledge of SQL and/or NoSQL databases.

Key personality attributes:

- Desire to learn, work on any technical task and be part of a supportive team.
- An active interest in the subject of Software Engineering (e.g. furthering knowledge through reading books, meetups, personal projects).

Benefits of the role include:

- 25 days holiday
- Pension scheme
- Dog friendly office
- Garden with BBQ
- Well stocked kitchen
- Pawsome team social events
